

One Year Limited Warranty

Quality Craft Wood Works, Inc. warrants to the original consumer purchaser that our cabinetry will be free from defects in material and workmanship under normal use for one year after the initial purchase of the cabinetry. This warranty is not transferable and no changes or modifications can be made to this warranty except by an officer of Quality Craft Wood Works, Inc.

Quality Craft Wood Works, Inc. may elect to replace or repair any defective product manufactured by Quality Craft Wood Works, Inc. covered by our warranty.

THIS WARRANTY DOES NOT COVER THE FOLLOWING :

- Natural aging and darkening of wood color or the variation in wood grain or color due to inherent growth characteristics.
- Defects caused by misuse, abuse, moisture, heat, negligence, alterations, environmental conditions, storage, handling or installation by anyone other than our approved installers.
- Wear caused by normal use or lack of maintenance.
- Hairline cracks which appear in joints and around functional hardware, particularly on painted cabinets, due to normal expansion and contraction of wood through temperature changes and regular use.
- Countertops, appliances, plumbing fixtures, etc. or the costs, including labor, to remove and reinstall materials and related components such as fittings, appliances, etc.

Wood, as with other natural materials, is affected by environmental factors such as light. Darkening or mellowing of wood color can be expected and is a natural process of wood as it ages. The variations in color and grain patterns of real wood are natural and are not considered imperfections. Due to these factors, if components are replaced, Quality Craft Wood Works, Inc. cannot guarantee that the finish of the replacement parts will exactly match the finish and appearance of the original parts.

Hardware Items

Door hinges, drawer slides and some other functional hardware carry a MANUFACTURER'S LIFE TIME LIMITED WARRANTY. This warranty declares that these items will be free from defects in material and workmanship under normal use. Replacement hardware items are subject to their availability from our suppliers. If any of these items prove to be defective within a one-year period after initial installation they will be replaced free of charge. After this one-year period, a service call will be charged for replacement or repair of these items.

From time to time, we will change design, specifications, and materials as conditions require and improvements are developed, but we have no obligation to incorporate such changes in products we have previously manufactured.

Quality Craft Wood Works, Inc. disclaims any responsibility for damages in excess of the purchase price.

Finish Disclaimer

- All images were taken in a controlled environment and may appear slightly different depending upon lighting, settings, and device display.
- If you are on a mobile device turn your brightness up to 90% for a more accurate color representation.

Natural Features in Wood

- Colors are affected by different features of the wood like density and grain and will vary between doors, drawer fronts, and face frames.
- Hairline cracks, especially around the hardware and joints, appear more visible on painted products. These features may become more noticeable as cabinets age due to the natural expansion and contraction of wood that occurs during seasonal temperature changes.
- Smoke and low ventilation areas can change color and appearance of painted cabinetry drastically.
- Some of these occurrences can be improved by selecting our **HDM** panels. Please contact a sales rep for more information.
- For the most accurate color representation please visit our office to see a color sample.

The Nature of Wood

It is important to know what to expect with the natural occurrences in real wood products. Because these occurrences take place naturally, it is impossible to warranty your cabinets against such activity. Please note that different wood species may be more or less susceptible to the examples shown below. Feel free to ask a sales representative if you have any questions!

Aging

Every type of wood ages differently. Exposure to sunlight increases aging speed.

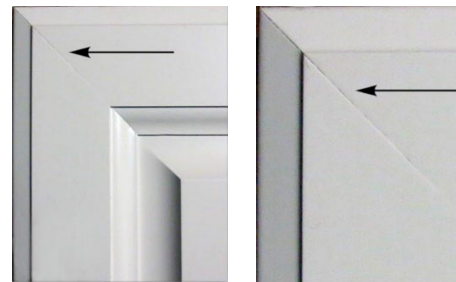

Color Variation

All woods vary somewhat in color from piece to piece.

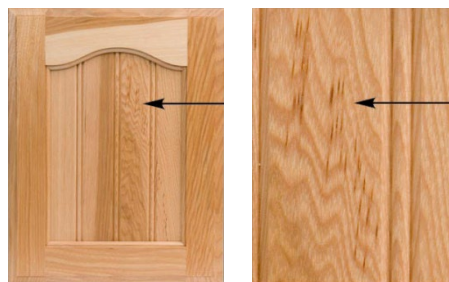

End Grains

End grains generally absorb more stain and other finishes. This can affect the appearance of the material

Joint Expansion

Due to the natural expansion and contraction of wood and the environment, joints may become slightly more visible over time.

Mineral Streaks

Some wood types have naturally occurring mineral streaks that differ from the wood grain.
